

# Types of Batches.

We follow a Master Batch structure, which serves as the primary batch into which learner enrollments are taken.

The naming convention for master batches is standardized for easy identification and tracking.

Eg. **Sep24-A301**

- ❖ Which means Initial three letters of the month in which it started "**Sep**"
- ❖ Two digits of the calendar year "**24**"
- ❖ Hyphen "-"
- ❖ Initial letter of the branch "**A**" which stands for Andheri

And we have given series for each package like

Data Science we have given **301** series

Full stack python we have given **401** series

AWS we have given **501** series

Full stack Java we have given **201** series

Digital Marketing we have given **601** series

Master in Software Testing with AI **701** series

Executive Program in DevOps with AWS **525** series

## Following are the type of batches and their stages.

**1-Upcoming Batches**-Upcoming batches are created with basic details, including start and end dates. The admissions team takes enrollment in these batches. On the scheduled start date, the batch status automatically shifts to "Not Started. Here the specialisation wise batches are also visible. You can view it for your branch.

**2-Not Started Batches-**Batches are automatically shifted from "Upcoming" to "Not Started" on their scheduled start date. However, they will remain visible under the "Upcoming" section until the admission close date has passed. On the start date the Branch Manager assigns the Academic Coordinator and Mentor, after which the batch is moved to "Started" mode.

The screenshot shows the 'Batches' page in the 'E-CLASS' system. The 'NOT STARTED' tab is highlighted with a red box. The table below shows four batches with their respective details.

**3-Started Batches- Started Batches-**These batches have commenced training/lectures. Learners are actively attending sessions and progressing through the course curriculum as per the planned schedule.

The screenshot shows the 'Batches' page in the 'E-CLASS' system. The 'STARTED' tab is highlighted with a red box. The table below shows four batches with their respective details.

Batch Code	Timing	Course	Start Date	Total Learners	Placed Count	Job Ready Count	Ongoing Modules	Coordinator	Mentor
May25-E328	7-9pm	D5DA10	May, 30	35	0	0	EXCEL (13%)	Priyanka Kumari	NEHA SHARMA

**4-Parked Batches-** Once the classroom sessions are completed, learners are tagged as "Course Completed." When all learners in a batch receive this tag, the batch is moved to "Parked" mode. At this stage, the batch is no longer active for training and is only considered for placement services.

The screenshot shows the 'Batches' page in the 'PULSE' system. The 'PARKED' tab is selected and highlighted with a red box. The table displays the following data:

Batch Code	Timing	Course	Start Date	Total Learners	Placed Count	Job Ready Count	Ongoing Modules	Coordinator	Mentor
May25-E328	7-9pm	D5DA10	May, 30	35	0	0	EXCEL (13%)	Priyanka Kumari	NEHA SHARMA

Apr25-E603	9-1pm-w	DM9	Apr, 27	9	0	0	ADVERTISING WITH GOOGLE ADS (40%)	Priyanka Kumari	Alisgar Babat

**5-Completed Batches-** Once all learners in a batch are either placed through us, self-placed, or marked as Alumni, the batch is moved to "Completed" status. At this stage, the batch no longer requires any further services from the institute.

The screenshot shows the 'Batches' page in the 'PULSE' system. The 'COMPLETED' tab is selected and highlighted with a red box. The table displays the same data as the previous screenshot:

Batch Code	Timing	Course	Start Date	Total Learners	Placed Count	Job Ready Count	Ongoing Modules	Coordinator	Mentor
May25-E328	7-9pm	D5DA10	May, 30	35	0	0	EXCEL (13%)	Priyanka Kumari	NEHA SHARMA

Apr25-E603	9-1pm-w	DM9	Apr, 27	9	0	0	ADVERTISING WITH GOOGLE ADS (40%)	Priyanka Kumari	Alisgar Babat

To summarise all the above the journey of a batch starts from Upcoming mode, then to Not Started, then Started, then Park and finally to Completed mode
